

AMENDMENTS TO THE SPECIFICATION:

Page 21, line 26 to page 22, line 7, please amend as follows:

In S12, the CPU 105 determines whether or not printing may be enabled.

Where it may be performed (YES in S12), the CPU 105 performs the routine to set a charge mode in S13, and executes the printing routine for the image data in S15.

Where printing may not be performed (NO in S12), the CPU 105 performs the routine to display a warning on the operation panel ~~[[200]]~~ 1300 in S14. In this case, actual printing is not performed.
